- Developer at Riot Games or Ubisoft: Specific programming languages (Javascript, HTML, CSS, Python), game design, user experience, team collaboration, passion for video games.

Dear Sir or Madam,

My name is Mezhoudi Moussa, a student in BTS SIO, passionate about pop culture. Having obtained a General Baccalaureate with a specialization in computer science and English, I distinguish myself with a high level of English and proficiency in French and Spanish.

My professional journey, including experiences at the technical service of the Villars town hall and as a stock manager in an import-export company, has allowed me to develop various skills.

As a former double champion of France in Kung-fu, I understand the importance of discipline and rigor, qualities fundamental in the role of a DPO. My experience has sensitized me to the issues related to data confidentiality, crucial in the field of video games.

My passion for pop culture and interest in video games drive me to apply at Riot Games as a DPO. Convinced that my profile, combining technical skills, languages, and sensitivity to confidentiality issues, would be an asset, I am motivated to contribute to the success of your company.

I am at your disposal to discuss in person how my skills and motivations can meet the needs of Riot Games. Looking forward to a meeting, please accept, Sir or Madam, the expression of my distinguished regards.

Sincerely, Mezhoudi Moussa
